

## KATHARINE HAYHOE

Katharine Hayhoe is an accomplished atmospheric scientist who studies climate change and why it matters to us here and now. She is also a remarkable communicator who has received the American Geophysical Union's Climate Communication Prize, the Stephen Schneider Climate Communication Award, and she has been named to a number of lists, including *Time* Magazine's "100 Most Influential People" and *Fortune* Magazine's "World's Greatest Leaders."

Katharine is a Professor at Texas Tech University in Lubbock, Texas, where she directs the Climate Science Center. She has a B.Sc. in Physics from the University of Toronto and an M.S. and Ph.D. in Atmospheric Science from the University of Illinois. Her research focuses on developing and applying high-resolution climate projections to understand what climate change means for people and the natural environment.

Katharine may be best known to many people because of how she's bridging the broad, deep gap between scientists and Christians – work she does in part because she's a Christian herself. She's been named by *Christianity Today* as one of their 50 Women to Watch and currently hosts the PBS digital series, "Global Weirding: Climate, Politics and Religion."
